

ROBERT BOWLES
Manager
Statistics & Forecast Branch
Federal Aviation Administration

Robert Bowles is manager of the Statistics & Forecast Branch in the Office of Aviation Policy and Plans, of the Federal Aviation Administration. In his current position, Mr. Bowles is responsible for providing traffic and activity forecasts for all FAA air traffic facilities, the publication of numerous statistical publications dealing with aviation data, and conducting two annual aviation forecast conferences. Mr. Bowles joined the FAA in 1980 as an industry economist, where he was directly responsible for developing all traffic and activity forecasts related to the U.S. commercial aviation industry.

Prior to joining the FAA, Mr. Bowles held positions as a transportation economist, with both the Department of Energy and the Interstate Commerce Commission. Mr. Bowles has also been employed in the private sector, spending over 8 years with Eastern Airlines in both their New York and Miami executive offices. Positions held with Eastern included manager of marketing forecasting and manager of forecast coordination. Mr. Bowles holds an M.B.A. degree from American University and a B.S. degree in economics from the University of North Carolina at Chapel Hill.
